EVENT REPORT

EVENT TITLE	World Tuberculosis Day
TYPE OF EVENT	Departmental
FACULTY INCHARGE	K.Mary Manjusha Rani
DEPARTMENT	Microbiology
DATE	24 th March 2020
VENUE	ONLINE
TARGET AUDIENCE	PG Students

OBJECTIVE:

To raise public awareness about the devastating health, social and economic consequences of TB (Tuberculosis). World Tuberculosis Day 2020 it's time to End TB!

BRIEF ABOUT THE EVENT:

Due to coronavirus as it has become pandemic we could not be able to conduct the event due to lock down in contry. But we could able to create awareness through online on 24th march . Students have noticed the importance of Tuberculosis awareness program. The information given to the students could definitely spread to everyone. We have made the students to Get the facts on TB, find out if at risk for TB, and to learn how TB is treated. Awareness on Diagnosis if a person is found to be infected with TB bacteria, other tests are needed to see if the person has latent TB infection or TB disease. Most of them unaware of skin testing during pregnancy TB skin testing is considered both valid and safe throughout pregnancy. TB disease can be treated by taking several drugs for 6 to 9 months.

OUTCOME:

Students will have awareness about this infectious organism its detection, diagnosis and treatments provided these can educate the community. This event is meant to provide updated and relevant educational information on TB for anyone interested in TB treatments and recent developments. Under the theme 'It's Time', the spotlight this year is on urgently accelerating the TB response to save lives and end suffering.

DETAILED REPORT:

A potentially serious infectious bacterial disease that mainly affects the lungs. The bacteria that cause TB are spread when an infected person coughs or sneezes. Most people infected with the bacteria that cause tuberculosis don't have symptoms. When symptoms do occur, they usually include a cough (sometimes blood-tinged), weight loss, night sweats and fever. Treatment isn't always required for those without symptoms. Patients with active symptoms will require a long course of treatment involving multiple antibiotics. Requires a medical diagnosis. Most people infected with the bacteria that cause tuberculosis don't have symptoms. When symptoms do occur, they usually include a cough (sometimes blood-tinged), weight loss, night sweats and fever. People may experience: Pain areas: in the chest Pain circumstances: can occur while breathing Cough: can be chronic or with blood Whole body: fatigue, fever, loss of appetite, malaise, night sweats, or sweating Also common: loss of muscle, phlegm, severe unintentional weight loss, shortness of breath, or swollen lymph nodes. Treatment isn't always required for those without symptoms. Patients with active symptoms will require a long course of treatment involving multiple antibiotics.

LIST OF PARTICIPANTS

S.No	Name of the student	Roll Number
1.	Hajra Kazim	1051-19-518-001
2.	Devarakonda Kaveri	1051-19-518-005
3.	Chiluka Madhuri	1051-19-518-006
4.	Ankapuram Jagadeeshwar Reddy	1051-19-518-010
5.	Kommu Saritha	1051-19-518-011
6.	Dhara Narender Srujana	1051-19-518-014
7.	Puchakayala Sowjanya	1051-19-518-015
8.	Ch Divyarani	1051-19-518-019
9.	Miryala Shivakumar	1051-19-518-020
10.	Udari Vasantha	1051-19-518-021
11.	Anjum Fathima	1051-19-518-022
